

Somil Sharma

Frontend Engineer | Dehradun, India | +91-8171876285 | iamsomilsharma@gmail.com

SUMMARY

Frontend engineer (React, Next.js, TypeScript) who builds 0→1 products at startup pace. Joined a US startup at ~30 engineers and shipped through its scale-up to 120+, building its CRM from the ground up while collaborating daily with US-based product, design, and GTM teams. Previously built payment flows processing ~65% of revenue at a fintech. AI-native engineering workflow; owns web performance end to end; rated a top performer in every role to date.

SKILLS

Languages: TypeScript, JavaScript (ES6+), HTML5, CSS3, Python, Java

Frontend: React, Next.js, Redux, Responsive Design, Web Performance (Core Web Vitals, CrUX, Lighthouse), SEO

Tools & Platforms: Node.js, NestJS, REST API Integration, Git, Docker, AWS, Mixpanel, AI-assisted development (Claude Code), Jira, Linear

EXPERIENCE

Frontend Engineer | Keychain (US-based startup) — keychain.com | Aug 2025 – Present

- Core engineer on Keychain's CRM, built from scratch: shipped the Accounts and Contacts modules end to end — list views with search, filter, and sort, detail pages, and activity timelines mapping user relationships against Keychain's 100K+ company graph.
- Built inline editing across the CRM's data tables (Accounts, Deals, Connections): Excel-like cell editing with optimistic updates, rollback on failure, and full error handling.
- Built automated Core Web Vitals monitoring (LCP, INP, CLS) on CrUX data with scheduled Node.js reporting and regression alerting; used it to catch a production CLS regression.
- Created a high-fidelity, resettable product demo environment for customer demos, with vertical-specific datasets, embedded routing, and feature-flag controls.
- Work AI-first: maintain the team's Claude Code skills and claude.md conventions; ran AI-driven spec validation across PRD, Gherkin, and Figma docs that surfaced 31 discrepancies before build.
- Frequent first responder on P0 production incidents (broken table scrolling, missing activity timestamps, filter outages), resolving most within 24–48 hours; also ship across the stack in the NestJS backend when features need it.
- Developed the platform's image-cropping flow, now used in ~40% of all image uploads.
- Mentor two interns on SEO initiatives; rated an exceptional performer in the latest review cycle.

Software Development Engineer 1, Frontend | Smallcase | May 2024 – Aug 2025

- Prime contributor to the payments modal on a leading retail-investment platform, powering checkout for ~65% of company revenue by integrating multiple microservices into a seamless, robust payment flow.
- Refactored complex legacy codebases and added automations, improving performance, readability, and developer productivity while reducing technical debt.
- Recognized among the organization's leading performers of the year.

Frontend Engineer Intern | Smallcase | Jan 2024 – Apr 2024

- Designed scalable Next.js architecture for the B2B business; improved page-load times through code splitting, lazy loading, and caching.

Frontend Engineer Intern | Euromonitor International | Oct 2023 – Jan 2024

- Built a ticket-management application in React.js; rated a top performer with a cumulative score of 34/35.

Founding Engineering Intern | Drone AI | May 2023 – Nov 2023

- Developed responsive React.js web applications as one of the first engineers on the team.

CERTIFICATIONS & TEST SCORES

- Meta Frontend & App Professional Certification (12 months)
- Scaler Frontend Certification — ranked 1st in a batch of 150 students
- TOEFL iBT: 118/120 (2026)

EDUCATION

Woolf University — MS, Computer Science

BITS Pilani — Integrated Bachelor's & Master's, Physics (Theoretical & Computational)
